

Agricultural Competitiveness Green Paper Submission

Date submitted

22/10/2014

Name of Organisation/Individual

Robert Williams Farmer (Retired)

What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

WATER SUPPLY

IRRIGATION of AREAS most suitable for PASTURE.

We can learn a lot from Israel.

I implemented an irrigation system to limit the use of water and deliver it to the areas of my crops and trees where it was most beneficial.

What policies from the Green Paper don't you support and why?

Building of Dams and Weirs on North Queensland Rivers has to be the FIRST STEP and will help stop the escape of wet season rains.

WATER is the key to unlocking the benefits of the massive area of arable land in North Queensland.

General Comment

Aquaculture is a natural second step to Water Conservation and Pasture growing.

The benefits from aquaculture can also help reduce the amount of fertilizer needed for crop growing.
