Name of Organisation/Individual

Heartland Droughtmaster Stud

What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

Drought proofing all properties

What policies from the Green Paper don't you support and why?

General Comment

Govt needs to immediately organise all excavators and dozer operators to get on all farms and de-silt all dams and build new ones so as to drought proof properties for the future.

New dams should be deep, fenced off with a solar pump taking water to a concrete trough set on a large concrete pad so the stock wont damage the ground.

With this type of drought management livestock owners will be better equipped to face these dreadful drought conditions we are suffering..

Presently all my dams have dried up and I have no stock left on the property so hence no Income.
