TYRES & WHEELS RIVERINA

What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

Impractical Laws and regulations.

Agriculture should be helped and NOT hindered by minority influences of Greeny, environmentalist, misanthropic persons who pressure government with their impractical ideas that make it harder for farmers to operate efficiently and profitably.

So,

Laws that Federal government has made over the years, particularly the MDBA plan should be rescinded as they are diametrically opposed to the increase of food and fibre production of family farms that by themselves are some of the most efficient in the world.

The mal administration of Water could hardly be worse and we need intelligent , practical persons to bring about change from the stupidity that exists that allows water to run down HEALTHY rivers and out to sea.

What policies from the Green Paper don't you support and why?

I support the general theme of the green paper

General Comment

We need to get going with the building of water storage infrastructure as we catch very little of the rain that falls on this, the worlds driest continent, is it 2% ? and 6 or 8% in the Murray Darling Basin?
