

## **Agricultural Competitiveness Green Paper Submission**

### **Date submitted**

12/12/2014

### **Name of organisation/ individual**

Charles and Kirstin Teusner

### **General Comment**

We support Peter Grocke's submission as our issues are very similar but have the added pressure of rural living/townships already having made broad acre agriculture untenable.

Unfortunately we don't have any opportunity to try to improve our overall business structure or look at macro agribusiness issues.

Local government (Barossa Valley Council) and state government issues give us so many micro issues to deal with just to try to operate from day to day and survive.

Please look at these issues seriously as whilst not many farmers have these issues for those who do they are very serious.

Again please find attached emails, Peter Grocke's submission and previous email sent to Peter Houston PIRSA.

Contact and further understanding of these issues would be greatly appreciated. We would like to invite the committee to SA to hear verbal submissions from farmers in the Barossa Valley.
