

Agricultural Competitiveness White Paper – Submission IP152

Terry Purnell

Submitted 24 March via email

to whom it may concern
during drought,hard times, our sheep,cattle, are some times shot, to reduce herds, or worse left to die of thirst or starvation.
if this stock, could be sent to be processed--canned soup, stews etc and the farmers were paid a minimal cost to cover, labour,transport
this money to come out of the foreign aid budget !

during hail ,storm, flood ,damage to crops,fruit. to save usable produce, and sent to be processed---juice,fruit salad,cereal, soup etc
again the farmers to be paid,minimal costs to cover picking transport etc
this money to come out of, the disaster and foreign aid budgets

hope fully this would
----- stop waste
help farmers,
help local, part time workers
help feed,starving refugees,disaster effected people, etc,
this would, i hope,

boost local economies !
which in turn, increase,taxes ,and return monies to forein aid

ps this would include gluts of fish, grain sources!

thanking you---terry purnell
