Name of Organisation/Individual

James Gardiner

What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

Since 1996 we have used the process of holistic management. This is animal impact and rest. Knowing the whole is greater than the parts we have succeeded in increasing the environment, production increase to about 400 percent while costs decreased by about 25 percent.

All of this and more has been delivered in federal parliament many years ago by the SCIENTIST who with another helped to develop the process.

What policies from the Green Paper don't you support and why?
