Centacare CQ

What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

What policies from the Green Paper don't you support and why?

General Comment

It's important that decisions about supports in times of drought, be made by people within the community. Resilience and good mental health are eroded when people feel powerless, and having decisions made about what is most needed in times of drought, by people outside of the community, disempowers people and in many cases doesn't result in the community receiving support that improves things.
