What are the top policies from the Green Paper that the Government should focus on in the White Paper and why?

The Murray River and other rivers. Does the water use fit the availability of water flow? Does South Australia get an equitable share?

Do small rivers, such as the Fitzroy in SW Victoria have enough emphasis placed on the quality of all aspects of the river? At present the Fitzroy is quite disgusting with rubbish and introduced weed.

What policies from the Green Paper don't you support and why?
